

PLAM LIQUID RELE

DESCRIPTION

Plam Liquid Rele Isoplam® is a transparent liquid release agent that, applied on Isoplam® wall moulds, avoid the attachment of cementitious parts of Isoplam® Plam Stone or Isoplam® Plam Rock to adhere on the mould.

Its special formulation, made of aliphatic solvents, lets it not ruin the mould on which it is applied and it protects them from the cement acidity. Moreover, it helps the stamping, leaving the surface of the product applied perfectly stamped.

Plam Liquid Rele does not leave remaining parts once dry.

APPLICATION

Plam Liquid Rele Isoplam® is ready for use.

It should be applied with a brush or airless on moulds.

If the mould is new, apply Plam Liquid Rele before each stamping for the first 4-5 times.

CONSUMPTION, PACKAGING AND STORAGE

The indicative consumption of Plam Liquid Rele is 0,015 Lt/m².

Plam Liquid Rele is supplied in tanks of 5 lt.

Store in closed containers in a cool and ventilated place. It can be stored for about 12 months in the original containers. The lot number indicates, in sequence, the year / month / day / progressive number of the day.

Immediately close open packages after their use.

WARNING

Plam Liquid Rele is flammable (so keep it away from heating sources) and it is harmful if inhaled or ingested.

The product is intended for professional use only.

IMPORTANT:

The product PLAM LIQUID RELE is intended for the use as indicated above. Adding any other product will impair the final result. All information contained herein is based on the best practical experiences and laboratory research. It is the customer's responsibility to determine whether the product is suitable for the intended application. The manufacturer declines all responsibility on the results due to incorrect application of its products. The product shall always be tested on a small area before full scale application.
