

PLAM NET ZINCATA

Galvanized net for Plam Rock

DESCRIPTION

Plam Net Zincata Isoplam® is an hot-dip galvanized electro-welded wire net that has excellent tensile strength and durability characteristics over time.

EMPLOY

In the creation of artificial rocks and scenographic elements, it is used to create the moldable support for the subsequent coating with Plam Rock Isoplam thixotropic mortar.
The special anti-rust galvanizing process also makes it suitable for outdoor applications.

TECHNICAL AND PERFORMANCE DATA

Height	102 cm
Length	25 m
Wire diameter	1,05 mm
Mesh size	12,7 x 12,7 mm
Roll development surface	25 m ²
Roll weight	22 Kg
Weight of galvanized coating	200 g/m ²
Breaking load	500-600 N/mm ²
Stretching	25%
Duration of anti-rust treatment	approximatley 7-8 years

PACKAGING

Plam Net Zincata Isoplam® is available in 25 m² rolls.
